Job Profile	Skill I Posses (S)	Skill I require (W)	Skill Grap (T)	work Plan| Time (O)
full Stack web developer. To develoP and deploy robust web application for different clients accord-ing to their requirement. To be fully equiped with	for the frontend Part I can have excelled HTML, CSS, Java-Script, Bootstrap. for the Backend Part I have excelled in	Since it is a vast and continuesly growing domain. various fro-ntend frame-work are there like React, view, Angular. Different backend languages	Most of the skill required requires a level of dedi-cation and an indepth knowledge of all the subject. React view Angular require a complete 6 Month dedi-cation	for the first 6 to 12 month i will dedicate it fully to front end Part first 6 month to excel it and other 6 moth to master it. meanwhile i will be doing some Projects to make my knowledge sound.

Job Profile	Skill I Possess ($)	Skill I Required (o)	Skill gap (T)	Work Plan Time (o)
The frontend and backend knowledge Server and client side programing its architecture to handle traffic.	node js. And for the database part I have excelled in MongdB, SqL. for Site hosting i am familiar with Amazon AWS.	Like coldfusion, P4P etc are there which i need Posses. Different new databases like dynamoDB by AWS. Different new Server hosting Platform are there like google microsoft azure. etc.	to excel. Those backend language require deep knowledge of backend architecture. Those new databases requires a through Practice in those language those new cloud Platform require a through knowledge of functionality each stuff perform.	then i will start working on the backend Part ill join some courses of NPTL or from carcera mean while doing minor frond end project to have touch with it. it will take another year. After that i will work on database and cloud part for another 6 month. After doing all these it will all be a matter of just having the skills.
